Disclaimer

Dear Dealer:

In our ongoing commitment to better serve you, we have revised our parts matrix to reflect our spectrum of fireplaces, both current and legacy. This document will be updated as models change and the availability of externally sourced parts adjusted in accordance with market demands.

As fireplaces age they require replacement parts. However, after years of heat-cool cycles, corrosion, or even lack of use, the integrity of the fireplace system itself becomes questionable. When the fireplace has reached the end of its life cycle, replacement of the entire system is often the safest, most efficient and most reliable option.

To ensure you order and receive the correct part(s), please provide the model AND serial number of the fireplace, as component substitutions may have occurred during assembly.

If you are unsure of which component you require, or would like clarification, please take a picture of the part and email it to techsupport@montigo.com. Be sure to include the fireplace model AND serial number.

The following abbreviations are used in this guide. Please familiarize yourself with them:

N/A - Not Available: The part has been delisted from our inventory and it is no longer available.

WQL - While Quantities Last: Please inquire before placing an order to confirm availability. Once current inventory levels have been depleted, the part will be updated to reflect N/A.

PLEASE NOTE:

Montigo neither recommends nor supports the use of parts and/or components sourced from non-authorized vendors, including online retailers. Use of such parts and/or components will void applicable warranties and could present hazardous situations.

This parts directory is to be used for informational purposes only. Please contact Montigo customer service and/or technical support for confirmation of part numbers, prices and availability.

Burner replacements must be verified by model, fuel type, serial number, and possibly a photograph. Please contact technical support for further information.

Prices subject to change without prior notice.

E&O.E.

Important

With a few exceptions, replacement part inventory levels for legacy models shall be considered 'WQL' (While Quantities Last).

BEFORE ordering, please confirm part availability.
ordersusa@montigo.com
orderscanada@montigo.com

If you are unsure of which component you require, or would like clarification, please take a picture of the part and email it to techsupport@montigo.com. Be sure to include the fireplace model AND serial number.

A NOTE ABOUT 'FRONTIER FIREPLACES': Parts for Frontier fireplace models F34 and F38 can be cross referenced to the C34 and C38 parts lists respectively.

PLEASE NOTE: No returns on parts ordered for legacy models.

Reading the Rating Plate

The rating plate is located in the Control box (PV) and/or in the compartment, typically underneath the burner assembly.
